Preface

The Petroleum Planning & Analysis Cell (PPAC), an attached office of the Ministry of Petroleum & Natural Gas (MoPNG), remains at the forefront of India's energy transition. Through rigorous data analysis and evidence-based insights, PPAC serves as a catalyst for informed decision-making in an era of heightened global volatility. With ongoing geopolitical instability in West Asia impacting global supply chains and pricing mechanisms, the availability of precise, real-time energy data has become indispensable for national energy security and strategic planning. The role of PPAC got strengthened with the government issuing a Gazette Notification dated 19.03.2026, designating it as a nodal agency for the collection, compilation, maintenance, and analysis of information under the **Essential Commodities Act.**

As the world's third-largest energy consumer, fourth-largest refiner, and fifth-largest exporter of petroleum products, India is a cornerstone of the global energy system. Projections indicate that India will account for nearly 30% of global incremental energy demand by 2050 and over 40% of global oil demand growth. To mitigate dependency on specific geographies and imported fossil fuels, India is aggressively diversifying its energy basket. Key milestones for the Oil & Gas sector in FY 2025-26 include:

1. Strengthening Strategic Reserves & Security

Source Diversification: India has expanded its crude oil sourcing network from 27 to 41 countries and now imports LNG from 18 nations. This deliberate strategy, coupled with the pursuit of alternative trade routes, bolsters national resilience against supply shocks.

SPR Phase II Expansion: The Union Budget FY26 allocated ₹5,597 crore to the Indian Strategic Petroleum Reserves Ltd (ISPRL) to fast-track Phase II storage facilities.

2. Upstream Regulatory Modernisation

The Oilfields Amendment Act, 2025 has modernised the regulatory framework, simplifying lease procedures and enabling integrated energy development—such as coupling exploration with decarbonization.

Petroleum and Natural Gas Rules, 2025 introduced a single petroleum lease system with a 180-day approval deadline to accelerate the Hydrocarbon Exploration Licensing Policy (HELP).

With expanded bidding rounds (OALP-X and XI), fiscal incentives, and improved data access, India offers a combined exploration potential of ~$100 billion across approximately 262,817 sq. km.

3. Downstream Developments & Refining Capacity

India's **refining capacity** exceeds 258 MMTPA. The **Barmer greenfield refinery (HRRL)**, with a capacity of 9 MMTPA of fuel and petrochemical products, **has achieved commercial operations**. The Numaligarh Refinery Expansion (NREP), aiming to triple capacity to 9 MMTPA, is on track for completion by December 2026. In addition, BPCL has announced an $11 billion Refinery near Nellore (9–12 MMTPA), while ONGC is planning an additional greenfield facility.

As of July 1, 2026, the national **retail network** has grown to 1,03,682 outlets across 13 entities, enhancing consumer choice.

4. Expanding the Gas-Based Economy

City Gas Distribution (CGD) has achieved near 100% geographical coverage across 307 geographical areas, with CNG stations exceeding 8,900.

Under **One Nation, One Gas Grid,** the operational pipeline network now exceeds 27,000 km, with 90% of pipelines under the Unified Pipeline Tariff (UPT) to harmonize transportation costs.

5. Biofuels and the Green Transition

India achieved a 20.0% average **Ethanol Blending** rate in ESY 2025-26(Nov'25- Jun'26), achieving the 20% target and saving over ₹47,156 crore in foreign exchange.

180 plants of **Compressed Biogas (CBG)** were operational at the end of year, and have converted organic waste into 43.7 TMT (Apr-Jun'26) of clean fuel. With CBG obligation in place, this biofuel is expected to replicate Ethanol success story in the coming years.

Sustainable Aviation Fuel (SAF): Indicative blending targets have been established for international flights starting in 2027.

6. Clean Cooking & Energy Access

PMUY has reached 10.57 crore households. Total active LPG consumers now stand at 33.14 crore, while **PNG** reaches 1.725 crore kitchens.

7. Renewable Energy and Atmanirbharta

In July 2025, **non-fossil sources** met over 51% of electricity generation capacity. The National Green Hydrogen Mission has seen costs drop by 15% to ₹279/kg ($3/kg).

The **SHANTI Act,** 2025 for nuclear advancements and the criticality of the indigenous Prototype Fast Breeder Reactor at Kalpakkam mark significant strides in long-term baseload stability.

There is a focus on renewable energy with prioritising for rooftop solar (PM **Surya Ghar** Muft Bijli Yojana), PM **Kusum** Yojana for pump sets and new funding for small hydropower development. Domestic manufacturing and grid stability are being incentivised through exemptions on **critical minerals** and support for **battery storage systems.**

To help stakeholders navigate this complex landscape, PPAC publishes the bi-annual 'Ready Reckoner', a comprehensive databank for the Oil & Gas industry. This edition provides the latest insights for FY 2025-26 alongside historical time-series data, offering a unified platform for policymakers, academicians, and market researchers.

The data within this Ready Reckoner is sourced from public and private sector companies and government bodies, undergoing rigorous multi-level scrutiny. The version-1 of this Ready Reckoner was released within one month of the close of FY 2025-26 to provide timely insights for urgent policy interventions. **This is the final version with updated international indicators, financial inputs and a few other data points.**

I acknowledge the concerted efforts of the PPAC officers and the vital cooperation of the Oil and Gas industry in compiling this report. We welcome your feedback at **v.kansal@ppac.gov.in** or **dirgen@ppac.gov.in** to further refine our data dissemination.

CHAPTER 2

Exploration & Crude Oil Production

Chapter Highlights

- Exploration & Production industry has come a long way in India from the first oil discovery in 1889 near the town of Digboi in the state of Assam to current 26 sedimentary basins in India, covering a total area of 3.4 million square kilometer. The area is spread across on land, shallow water up to 400-meter water depth and Deepwater further up to Exclusive Economic Zone (EEZ).

- The Government of India has taken several steps to increase the crude oil & gas production in India through various policy initiatives towards Exploration & Production activities by allocating & awarding Blocks to both National & Private E&P companies.

- In this regard, starting from Pre-Independence era (1886 – 1946) to Nomination Basis era where Petroleum Exploration License (PEL) was awarded (1947 – 1990), then Pre NELP era where Petroleum Mining Lease (PML) was awarded (1991 – 1996) then NELP (New Exploration Licensing Policy) era and then HELP (Hydrocarbon Exploration Licensing Policy) era India has taken several policy initiatives to boost domestic Crude Oil & Gas production.

- Further to the above exploration policies, MoPNG introduced DSF (Discovered Small Fields) policy in 2016 to monetize the unmonetized/relinquished discoveries of Nomination and PSC regimes. MoPNG has introduced OLAP (Open Acreage Licensing Policy) under HELP policy in 2016.Recently MoPNG has introduced OALP Round X.

- During FY 2025-26, Indigenous Crude Oil production, including condensate, reached 27.9 million metric tons.

- Around 43% of Crude Oil(including condensate) is produced in Western Offshore, followed by Gujarat Onshore 19%,Assam Onshore 16 % ,Rajasthan Onshore 11%and Eastern Offshore 10%.

Notes:

Data is as on end of 2020.

Total proved reserves of oil - Generally taken to be those quantities that geological and engineering information indicates with reasonable certainty can be recovered in the future from known reservoirs under existing economic and operating conditions. The data series for total proved oil reserves does not necessarily meet the definitions, guidelines and practices used for determining proved reserves at company level, for instance as published by the US Securities and Exchange Commission, nor does it necessarily represent the EI's view of proved reserves by country.

Reserves-to-production (R/P) ratio - If the reserves remaining at the end of any year are divided by the production in that year, the result is the length of time that those remaining reserves would last if production were to continue at that rate.

Canadian oil sands 'under active development' are an official estimate. Venezuelan Orinoco Belt reserves are based on the OPEC Secretariat and government announcements. Reserves and R/P ratio for Canada includes Canadian oil sands. Reserves and R/P ratio for Venezuela includes the Orinoco Belt. Saudi Arabia's oil reserves include NGLs from 2017. Reserves include gas condensate and natural gas liquids (NGLs) as well as crude oil. Shares of total and R/P ratios are calculated using thousand million barrels figures.

Table 2.10: Status of Shale Gas and oil development in India (As on 01.4.2026)

Policy	Details
Policy Guidelines for Exploration & exploitation of Shale gas and oil	Shale gas and oil exploration policy was announced in October, 2013. ONGC and OIL India Ltd have been allotted 50 and 6 blocks respectively for assessment under Phase-I. ONGC identified 50 blocks in 4 basins and OIL identified 6 blocks in 2 basins in Phase-I. GEECL has carried out initial assessment of shale gas potential and planning to drill core holes in their CBM blocks in Raniganj south. EOGEPL has also assessed shale gas potential in their CBM blocks in Raniganhj east area and drilled two shale gas core holes for detailed studies.
	Under Hydrocarbon Exploration and Licensing Policy (HELP), 2016, all types of hydrocarbon resources, both Conventional and Unconventional including CBM, shale gas/oil, tight gas and gas hydrates were allowed to be explored and exploited.
	In August 2018, the Government of India notified a Policy framework for Exploration and exploitation of Unconventional hydrocarbons in existing acreages under existing Production Sharing Contracts (PSC), Coal Bed Methane (CBM) Contracts and Nomination fields.

Chapter Highlights

Natural Gas

1. Domestic Natural Gas production:

- The domestic Gross Production of natural gas for the FY 2025-26 period has shown a decrease of 3.7% when compared with FY 2024-25 i.e. a decrease of 1338 MMSCM from 36113 MMSCM in FY 2024-25 to 34776 MMSCM in FY 2025-26 (P).

  b. The decrease is mainly due to a decrease in production of natural gas from PSC/ JVs fields (6.7%), ONGC (1.7% from nomination fields) and OIL (2.4% from nomination fields.)

2. LNG import:

- The LNG Imports in volume terms decreased by 3.6% i.e. to 34427 MMSCM in FY 2025-26 (P) from 35720 MMSCM in FY 2024-25. In value terms, the LNG Imports in US $ terms, have shown a decrease of approx. 10.4% i.e. to US $ 13356 Million in the period FY 2025-26 (P) from US $ 14908 Million in the period FY 2024-25. Source: DGCIS

3. LNG terminals capacity utilization:

- Utilization of LNG terminal capacity of 52.7 MMTPA in the period April 2025 - Mar 2026 ranged from 6.2% (Chhara Terminal) to 91.9% (Dahej LNG terminal).

4. CGD Networks:

- In terms of infrastructure, as on 01.04.2026, there are 8916 CNG stations and 17021202 PNG connections (DPNG- 16949377 Nos., Commercial- 49994 Nos., Industrial- 21831 Nos.) (Source: PNGRB)
- CNG stations has increased by 10.52% from 8067 CNG stations as on 01.04.2025 and D-PNG Connections have increased aggregatively by 12.68% from 15041471 Connections as on 01.04.2025

5. Consumption:

- From availability perspective: Total Yearly Consumption for FY 2025-26 (including internal use i.e Net Production + LNG import) stood at 68753 MMSCM, showing a decrease of approx. 4% compared to the previous corresponding period with 71314 MMSCM consumption. (Source for LNG Import: DGCIS)
- Sectoral Consumption: Major Sectors for NG Consumption during April 2025 - March 2026 are Fertilizer (28%), CGD (24%), Power (11.5%), Refinery (8%) and Petrochem (6%).

Refining & Production

- As per April 2026 the Nameplate Refining Capacity of India is 258.1 MMTPA. India stands as the second-largest refiner in Asia and the fourth largest globally. The country is equipped with 22 operational Refineries, with private companies holding approximately 34.3% of the total refining capacity.

- The commissioning of HPCL Rajasthan Refinery Ltd. (HRRL), a joint venture between Hindustan Petroleum Corporation Limited (HPCL) and the Government of Rajasthan (GoR), is underway. The equity participation in the venture is 74% by HPCL and 26% by the Government of Rajasthan, and it has a capacity of 9.0 million metric tons per annum (MMTPA). Numaligarh Refinery is under capacity augmentation from 3 MMTPA to 9 MMTPA.

- The crude Oil processing during FY 2025-26 (P) was 272.0 MMT, during this period the average capacity utilization was 106 %.

- The total production of Petroleum products during FY 2025-26 (P) was 284.9 MMT out of which 281.5 MMT was produced from the processing of Crude Oil and Other Inputs in the Refineries. The Share of Lighter Distillates like LPG, Naphtha, MS etc was 36.2% out of the Total Production from refineries. Share of Middle Distillate like SKO, ATF, HSD etc was 50.7% and Heavy Ends like Petcoke, FO, LSHS, Bitumin etc was 13.0 % of the total production from refineries. Among the Total domestic production of petroleum products the share of HSD was 42.4 % followed by MS 17.0%, Naphtha 6.5%, ATF 5.8%,Petcoke 5.2% and LPG 4.6%.

Export & Import
Crude Import

The crude oil imports during FY 2025-26 registered a 1.0% increase compared to the previous year.

Product Exports

- During FY 2025-26, the exports of Petroleum, Oil, and Lubricants (POL) products saw a decrease of 5.6% compared to the previous year. The decrease in POL product exports in FY 2025-26 was primarily attributed due to a decrease in the export of aviation-turbine fuel (ATF) and high-speed diesel (HSD) etc. In value terms, exports during FY 2025-26 dropped from 44.4 billion US dollars to 41.1 billion US dollars, marking a 7.4% decrease compared to FY 2024-25. High-speed diesel (HSD), motor spirit (MS), and aviation turbine fuel (ATF) emerged as the top three products in the export basket of petroleum products during FY 2025-26, with shares of 44.5%, 27.1%, and 11.1%, respectively.

Product Imports

- During FY 2025-26, imports of petroleum products experienced a notable decrease of 9.3% compared to the previous year. The decrease in imports during this period was primarily driven by a decrease in the import of petcoke and fuel oil (FO) etc. Within the import basket of petroleum products in FY 2025-26, Liquefied Petroleum Gas (LPG) held the highest share at 46.0%, followed by petcoke at 21.7%, and fuel oil at 11.7%. The entire quantity of petcoke was imported by private importers.

Crude oil imports decreased by 14.9% and increased by 1.0% during March 2026 and April-March FY 2025-26 respectively as compared to the corresponding period of the previous year

Imports made due to deficit in production viz. LPG and Lubes/LOBS accounted for 52.9% share of total POL products import during April-March FY 2025-26 as compared to 46.2% during April-March FY 2024-25.

Imports of naphtha and FO were done for commercial and technical considerations and accounted for 14.2% share of total POL products import during April-March FY 2025-26 as compared to 16.9% during April-March FY 2024-25.

Decrease of 5.6% was recorded in POL products export during April-March FY 2025-26 as compared to during April-March FY 2024-25 mainly due to decrease in exports of aviation turbine fuel (ATF) and high-speed diesel (HSD) etc.

CHAPTER 5

Major Pipelines in India

Chapter Highlights

Major Pipelines in India

- Pipelines play a crucial role in maintaining the supply chain for crude oil, petroleum products, and gas in the country. Onshore cross-country pipelines are buried underground at a depth of approximately 1.5 meters within a corridor spanning about 18 meters, operating at elevated pressures. As of March 31, 2026, the total length of the crude oil pipeline network in India is 10,443 kilometers, boasting a capacity of 153.1 million metric tons per annum (MMTPA). During FY 2025-26, the utilization of crude oil pipelines stands at 66.7%.

- Product pipelines, inclusive of LPG, form a comprehensive network spanning 24861 kilometers with a capacity of 155.8 MMTPA. During FY 2025-26, the utilization of product pipelines reached 68.4%.

- Natural Gas Pipeline infrastructure- is an economical and safe mode of transporting natural gas by connecting gas sources to gas consuming markets. Gas pipeline grid determines the structure of the gas market and its development. Therefore, an interconnected National Gas Grid has been envisaged to ensure the adequate availability and equitable distribution of natural gas in all parts of the country. As on 31st December 2025, there is about 25,925 km long Natural Gas pipeline network which is operational in the country. In order to make available natural gas across the country, it has been envisaged to develop additional about 7301 km pipelines (excluding Tie-in connectivity, dedicated & STPL) to complete the National Gas Grid and same are at various stages of development. This would ensure easy availability of natural gas across all regions and potentially help to achieve uniform economic and social progress.

Oil India Limited

Chapter Highlights

- Overall consumption of POL for FY 2025-26 in the Country was recorded at 241.6 MMT with a modest growth of 1.0% over the corresponding period in FY 2024-25. Growth in the petroleum products is driven by growth in LPG at 5.9%, MS at 6.5%, 3.6% growth in HSD while growth in ATF recorded at 2.0%.

- During the last decade from FY 2015-16 to FY 2025-26, a CAGR of 6.9% was achieved in MS consumption, CAGR of 5.4% in LPG, CAGR of 3.9% in ATF and CAGR of 2.4% in HSD. Rising Private vehicle ownership, increased economic activities and strong push for cleaner fuels for cooking is driving up the demand for MS, HSD, ATF and LPG.

- The country achieved an Ethanol Blending in Petrol (EBP) level of 14.6% during ESY 2023–24 (November 2023–October 2024). The blending percentage increased significantly to 19.2% during ESY 2024–25 (November 2024–October 2025). The ethanol blending level reached 20% during current ESY 2025–26 (November 2025–March 2026).

- The Retail network in the Country at 1,03,023 RO's as on 1.4.2026, wherein Rural RO's also reached to 29,526.

- Alternate fuels are available at 33,888 Nos. of RO's as on 01.04.2026 and EV charging infrastructure is available at 29,047 RO's thereby partnering well in shift towards electrification of vehicles.

- The 24% growth in the total number of retail outlets as of 01.04.2026 compared to 01.04.2022. The region-wise growth is highest for the North-Eastern region (40%), followed by the Northern region (25%), Western region (24%), Southern region (23%), and Eastern region (22%) during the same period.

- Direct Sales of HSD recorded at 13% of total HSD sales for FY 2025-26.

- International aviation contributed to 39% of the total ATF volumes of 9.16 MMT during FY 2025-26.

- 313 depots and terminals spread throughout the country ensure uninterrupted supply of fuels to consumers.

1. Data in respect of enrolment, customers, distributors, ALDS and rated bottling capacity pertain to PSU OMCs only.
2. Gross tankage includes LPG tankage at LPG bottling plants owned by PSU oil companies, all refineries, fractionators and LPG import terminals.
3. MOPNG vide letter no. P-20019/2/2016-LPG dated 23 June 2016 had issued unified guidelines for selection of LPG distributors. In the said guidelines, LPG distributor categories have been redefined. The historical data on LPG distributors has been rearranged in line with the new classification for comparison.
4. * " The LPG coverage is calculated by PSU OMCs based upon the active LPG domestic connections and the estimated number of households. The number of households has been projected by PSU OMCs based on 2011 census data. Factors like increasing nuclearization of families, migration of individuals/ families due to urbanization and reduction in average size of households etc. impact the growth of number of households. Due to these factors, the estimated no. of households through projection of 2011 census data may slightly differ from the actual no. of households in a State/UT. Further, this methodology does not include PNG (domestic) connections."

CHAPTER 8

PRICE & TAXES

Chapter Highlights

- The fiscal year 2025–26 began with relatively low international crude oil prices, primarily due to the impact of the U.S. President's aggressive trade and energy policies, coupled with the OPEC+ unwinding of production cuts of 2.2 million barrels per day (bpd) along with ample supplies from non-OPEC producers (particularly from the U.S., Guyana, Brazil, and Canada) contributed to a well-supplied market amid modest global demand

- However, the US–Israel–Iran conflict, which began on 28 February 2026, severely disrupted global petroleum supply chains for both crude oil and refined petroleum products particularly through the Strait of Hormuz , leading to a sharp increase in international FOB prices. Regional demand-supply imbalances further intensified the upward pressure on crude and product prices. The price of the Indian basket of crude oil, which averaged US$ 69.01/bbl in February 2026, surged to US$ 135/bbl during the first week of April 2026 before averaging US$ 106.23/bbl in May 2026. However, international crude oil prices partially softened in June 2026, with the Indian Basket averaging US$ 83.22/bbl, primarily due to the interim ceasefire and subsequent negotiations between the United States and Iran, which eased geopolitical tensions

- Oil & Gas industry is one of the most important contributors to Central & State Exchequers. During the FY 2024-25, Petroleum sector contributed Rs. 4,24,827 crores to Central exchequer by way of various Taxes /duties on crude oil & petroleum products. Further the contribution for the period FY 2025-26 is Rs. 4,75,739/- crores. The Contribution of petroleum sector to State exchequer during FY 2024-25 was Rs. 3,33,397 crores by way of VAT and other taxes, royalty, etc. Further the contribution for the period FY 2025-26 the amount is Rs. 3,41,821/- crores

- The subsidy burden on petroleum products was Rs. 27,584 crores during FY 2025-26 and Rs.14,810 crores during FY 2024-25.
